# REQUEST FOR APPROVAL OF "RCRA STABLE" STATUS FOR TANKS IN SYSTEM #18 IN BUILDING 771 - TAH-082-99

As stated in the *Phase I Summary Report of RCRA Closure Activities for Tank and Ancillary Equipment System #18 in Building 771 (RF/RMRS-99-450 UN)*, tanks D-3, D-4, D-86, D-87 and D-88 meet the requirements for the "RCRA Stable" condition as a result of Phase I closure activities for Tank and Ancillary Equipment System #18 in Building 771. Rocky Mountain Remediation Services, L.L.C. requests that these tanks be approved as "RCRA Stable" with the attendant provisions.

Because the tanks are now isolated from all remaining process piping, and the termination points have been sealed, no additional liquids can be introduced into the tanks. In addition, the tanks are empty of liquids in that no additional liquids could be removed from the tap on the drain line at the bottom of each tank. Therefore, we propose that these tanks be inspected quarterly until their removal from Building 771.

Upon approval of the "RCRA Stable" status by CDPHE, the tanks will be labeled with their regulatory status and approved inspection frequency.

Please submit this request for "RCRA Stable" status to CDPHE at your earliest convenience. A draft letter to CDPHE will be provided for your use.

If you have any questions, please contact Tom Baker at 303-966-4329.
